# COMMITMENT

The client is at the centre of our activity and client satisfaction is our main priority. That is why Irontech Group has a charter of commitment and best practices with customers, with useful information on the services provided and the commitments acquired with the company.

We act with responsibility, efficiency, rigour and respect to guarantee the full satisfaction of our clients.

For this reason, we have made a number of public commitments.

THIN CLIENT INDUSTRIAL

**THIN CLind** is a comprehensive thin client solution developed by **Irontech Group**, combining lightweight industrial hardware with an operating system optimized for industrial environments. Designed to connect to remote services and web applications, it allows centralized control and monitoring of workstations through a web console accessible from both mobile and desktop devices. Its main advantages include:

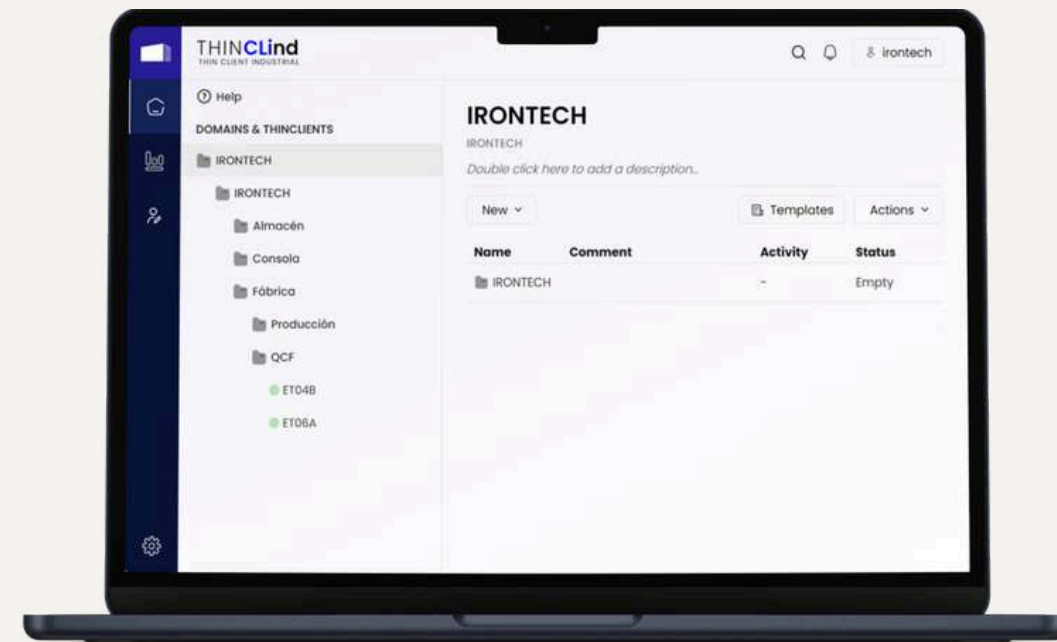

- Reduced costs in hardware and software licenses
- Faster incident management through remote access
- Easier preventive maintenance forecasting
- Improved efficiency in managing equipment networks
- Compliance with industrial cybersecurity standards and cryptographic protocols (ISO 27001)

**THIN CLind** is available across all Irontech device families, offering a flexible and efficient solution for industrial automation.

## CONSOLE

The console is a management center accessible from a computer or mobile device, allowing you to view, manage, modify, and even take control of any terminal connected to **THINCLind**. It enables:

- Remote management of **THINCLind** devices
- Profile configuration
- Access settings
- Configuration copy and deployment
- Remote control and real-time monitoring
- Work area segmentation
- Configuration templates by zone
- Multi-user system
- Different authorization levels
- Visibility segmentation by zones
- Usage statistics, both historical and real-time
- Device update management

# Thank you
